

Restoring Implants

Communications, Protocols & Workflows – Easy!

Is restoring implants as easy as:

Placing an impression coping

Taking an impression

Then waiting for the restoration to be returned from your Lab?

**3 CPD
POINTS**

Topics Covered

Implant protocols

Types of impressions

Identify correct impression copings

Abutment considerations

Material options and ability to decide materials

Restorative options

Setting protocols in place for implant restoration

Learning Outcomes

At the conclusion of the evening participants should be able to :

Understand the importance and techniques of communication, planning and work flows between restorative dentists, dental lab and surgeon.

Presented by: Dr. Shayne Scott & Mr. Robert Hill

Dr. Shayne Scott graduated from The University of Western Australia in 2000 and has been practising general dentistry ever since. Shayne recently became the practice owner of RP Dental in Wodonga.

Shayne provides dental services across a wide range of fields, particularly endodontics, general restorative and preventive dentistry and family focussed treatment, from children's care to full dentures. Shayne has worked all over Australia and has accumulated sound knowledge and experience from the vast and varied population she has worked with.

Shayne has a passion for providing excellent and caring services to all. She believes in education and prevention should be the core of the dental industry and that the dental health cannot be separated from our total health and wellbeing.

Mr. Robert Hill graduated from RMIT University in 1972 as a Dental Technician and has been a dental lab owner since 1979. Due to his passion, knowledge and experience, Rob has been a leader with a sound and credible voice for the dental industry for over 40 years. He has actively participated in a number of associations (AOS, VCBS, Australian Society of Occlusal Studies, etc.) as a member, board member and president and testing laboratory for multinationals.

Rob has presented both locally and internationally. He also has a number of articles published including one that was translated to German.

Rob's interest is sharing his knowledge, experience and passion on dental issues to continually improve the dental industry and its practitioners.
